About Embedded Systems Week (ESWEEK)

Embedded Systems Week (ESWEEK) is the premier event covering all aspects of hardware and software design for intelligent and connected computing systems. By bringing together three leading conferences (CASES, CODES+ISSS, EMSOFT), a symposium (NOCS), and hot-topic workshops and tutorials, ESWEEK allows attendees to benefit from a wide range of topics covering the state of the art in embedded systems research and development.

Tutorial Proposal Submission

Deadline:

April 16, 2022 (AOE)

Tutorial Day:

Friday, October 07, 2022

Single Registration System

Registered attendees can attend sessions in any of the online events including conferences (CASES, CODES+ISSS, EMSOFT), the NOC symposium, tutorials, workshops, and education classes.

Covid-19 planning: Given the continued uncertainty regarding the spread of the different variants of Covid-19 virus, ESWEEK 2022 is currently planned as a hybrid event, with the on-site component in Shanghai, China. For all non-local attendees (not from China), virtual attendance and remote presentation will be allowed. Please watch the website or social media channels for updates.

Tutorial Proposals

For ESWEEK 2022, we invite you to submit high-quality, timely tutorials to enrich the technical program. Tutorials offer a unique opportunity where presenters can interact closely with attendees, and attendees can gain in-depth technical knowledge and hands-on experience on a specific topic. Tutorials on all topics related to embedded system design, analysis and development are welcome. ESWEEK 2022 tutorials will take place on Friday, October 7, and can be either half day or full day lecture style events or hands-on labs. Proposals should be submitted before the deadline of **April 16, 2022 (AOE)**.

Submission Details: A 2-page maximum PDF file, including the following information:

- Title of the tutorial
- Abstract (max. 500 words) describing motivation, intended audience, and main contents.
- Organizers and instructors with short bios, affiliations, and expertise in the proposed topics.
- List of topics to be covered.
- Length and format of the tutorial (lecture, hands-on), and how you plan to deliver it virtually, e.g., how will attendees access any necessary software and interact with instructors?
- If the tutorial has been offered previously, please specify the conference, date, and number of attendees.

Please submit your tutorial proposal through the SoftConf website <https://www.softconf.com/m/esweek22-wt>. If you have any questions about the submission of the **ESWEEK 2022 Tutorial proposals**, please contact Selma Saidi at selma.saidi@tu-dortmund.de.
